

**Visit us at analytica Messe München – stand no. 530 in hall A2
10–13 April 2018, Munich**

Dear Sir or Madam,

BioChem will again be represented at analytica, the important international trade fair for laboratory technology, analysis and biotechnology.

There we will introduce our enlarged “**Center for identification of microorganisms**” with state-of-the-art methods: beside classical morphological analysis from now on we will offer mass spectrometry analysis by **MALDI TOF** and molecular biological identification by means of the unique “**tree by nadicom**” database which BioChem took over. Now you can get the whole range of reliable identification of bacteria, yeasts and moulds from one single source.

Meet our experts in order to talk about your specific issues and topics and to learn more about BioChem’s portfolio:

Dr. Sven Asche, head of analytical department

Dr. Jürgen Branke, technical managing director

Dr. Dominik Herzog, head of molecular biological department

Dr. Holger Kühn, head of microbiological/molecular biological laboratory

Arrange a personal meeting with your BioChem contact person at the analytica in Munich now. Simply contact us by phone at +49 721 9737-110 or by e-mail to monika.wirtz@biochem.de. Please let us know if you wish to get **free** vouchers for **one-day tickets**, we would be glad to invite you to the trade.

We are looking forward to welcoming you at our stand no. 530 in hall A2.

With kind regards,

Dr. Jürgen Branke
Technical Managing Director
